Dual Fuel Agreement

This Agreement made and executed this _____ day of _____, 20____, by and between People's Energy Cooperative headquartered in Oronoco, Minnesota (hereinafter referred to as the "Cooperative") and _____ (hereinafter referred to as the "Member").

In the joint interest and benefit of the named parties, to conserve the use of electrical energy and to minimize the cost of electrical energy sold and delivered by the Cooperative to the Member, the primary intention of this Dual Fuel application is for controlling the primary heat of a home or building with controllable electric heat. **Dual Fuel's application involves electric heating as the primary source of heat and the use of a secondary or back up fuel source, primarily oil or gas, where automatic switching can occur when the demand for electricity peaks or there is an economic reason to control your electric load. The secondary heat source must be capable of controlling 100% of Member's heating needs.** The dual fuel heating control system is installed to control space heating and electric water heater loads. **Air conditioning, other appliances and equipment shall not be connected to the Dual Fuel Heating panel.** The Cooperative has made "Rate Schedule F" available for Dual Fuel Heating for qualifying members.

The named parties agree to the following:

1. The Member's primary heating source shall be electric heat, thereby qualifying for the special Dual Fuel Space Heating Rate.
2. Member must wire its premises to allow for the outside control and metering of energy under "Rate Schedule F".
3. Member will provide all disconnect devices and wiring in accordance with the Cooperative's specifications and subject to the Cooperative's approval. The wiring must meet all National Electrical codes and an electrical certificate is required.
4. Member must submit pictures of their electrical panel and any equipment connected to the dual fuel panel prior to receiving the Dual Fuel Rate.
5. The Cooperative will furnish the radio receiver control device which shall remain the property of the Cooperative. The Cooperative reserves the right to interrupt Member's load by remote control radio receiver.
6. The Cooperative shall have authority to interrupt service taken under "Rate Schedule F" at times indicated in the Schedule, recognizing the Cooperative may change the available service times from time to time as their load characteristics may require.
7. Problems occurring with controlled loads shall be analyzed and corrected by an electrician. The Cooperative will reimburse the homeowner for costs only if the problem was with the control device supplied by Cooperative.
8. Member shall not utilize electric energy for similar loads in an uncontrolled manner and agrees to allow the Cooperative to periodically inspect their home to monitor electric usage. Member further agrees if the Cooperative determines energy usage has not been consistent with this agreement,

all control devices will be removed and Member must wire the premises to allow for all electrical usage to be metered through one meter and all energy will be billed per the applicable electric rate schedule as set by the Cooperative. In the instance all electrical usage is not re-wired through one meter by the member, then the member will be considered to be non-compliant with this agreement and the meter will be moved to the applicable rate schedule as set by the Cooperative.

9. The Cooperative shall not be liable for any economic loss or personal discomfort due to either the satisfactory operation or a malfunction of the control device or to periods of power interruption, without regard to their duration. No override or bypass devices are allowed.
10. The Cooperative reserves the right to modify the terms and conditions of "Rate Schedule F".
11. This Agreement shall be in effect as of the date indicated, for the period in which the current Member is occupying this location. The Member and/or Cooperative shall have the right to terminate this agreement at any time. When service under "Rate Schedule F" is terminated, the Member shall modify the electrical wiring to allow all electric usage to be metered through one meter. If terminated, Member shall not be eligible to apply for "Rate Schedule F" for a period of 12 months.
12. This Agreement shall be binding upon and inure to the benefit of the successors, legal representatives and assigns of the respective parties.

DUAL FUEL INFORMATION

The following must be completed prior to connection the Dual Fuel heating system.

METERING TYPE: Parallel Sub-Meter

CONNECTED WATTAGE: Electric Heat _____ watts _____KW

TYPE OF ELECTRIC HEAT

- _____ Baseboard (____KW)
- _____ Ceiling Cable (____KW)
- _____ Cove (____KW)
- _____ Furnace (____KW)
- _____ Electro-Mate (____KW)
 15" 18"
- _____ Electric Boiler (____KW)
- _____ Floor Heat (____KW)

TYPE OF BACK UP HEAT

- _____ Natural Gas
- _____ LP
- _____ Fireplace with automatic thermostat
- _____ Oil
- _____ Other _____

OTHER EQUIPMENT CONTROLLED

- _____ Water Heater (____KW ____Gallons)
- _____ Other Equipment

NOTE: Not all connected loads will follow the same control schedule.
